MaxReti: Reimagining the skincare potential

Vitamins play an important role in overall skin health with retinol being one of the key components. Retinol is essential for the maintenance of epithelial tissues and is known to stimulate the production of new skin cells. When retinol is incorporated in skincare routines, it helps in enhancing collagen production, skin renewal and reducing uneven texture and discoloration.

Product Portfolio

Product Details

Dose Recommendation

MaxReti 100

Vitamin A alcohol (Retinol) USP min 3.16 mIU/ g
